How the Best Price Guarantee works

The Best Price Guarantee applies to all prices that are published on the internet. Conditions for these prices are that availability is offered through the found site and that the room can be booked at that price.

The 'reference price' consists of the bookable price, **including** any published additional booking costs that need to be paid per booking by any guest. It suffices if the guest makes a **print screen** of the booking page (with all relevant booking details included) and adds this to the Best Price Guarantee form. The guest then makes the hotel booking through the Valk Exclusief website and attaches the print screen of the other website with the 'reference price' to this form.
